

# CMMC Achieved.

Simple.Effective.Efficient

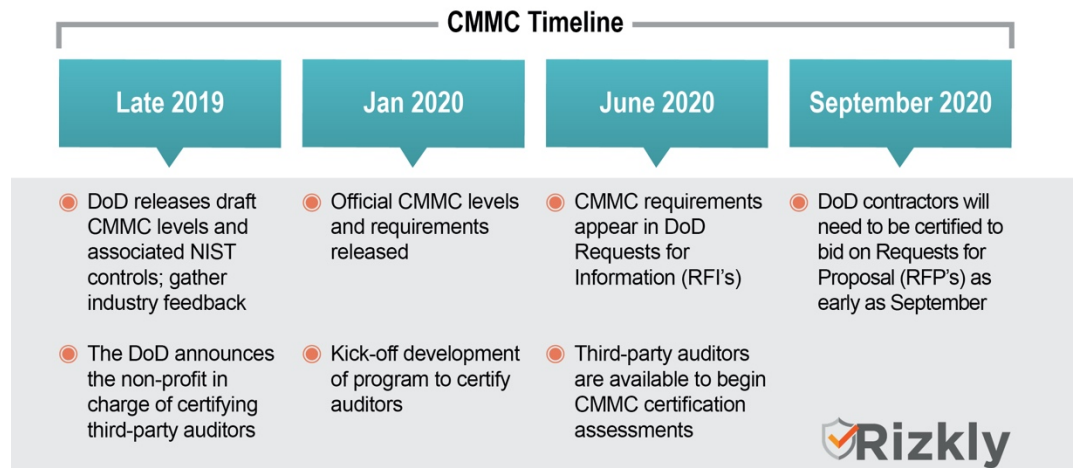

## All Contractors Must At Least Certify at Level 1

The DoD is finalizing a new set of cybersecurity standards for doing business with the department: The Cybersecurity Maturity Model Certification (CMMC). The new regulations aim to combine various cyber control standards such as NIST SP 800-171A, 800-171B and NIST SP 800-53 into one unified standard for cybersecurity.

CMMC represents more stringent DoD scrutiny of security controls for defense contractors. Beginning in 2020, CMMC will require DoD contractors to undergo a third-party audit to certify compliance for handling CUI at levels 1 to 5. The certification will then become a requirement for new contract awards.

spending all of their time preparing and worrying about CMMC assessment readiness.

However, we realize that an software is not enough for most DoD contractors. No matter how “easy” it is to use an application, Rizkly understands that success requires continuous guidance and handholding which is what our virtual compliance officers (vCOs) provide each customer pursuing CMMC compliance

## A Certain Path to CMMC Success

Rizkly provides your firm with a powerful tool along with an expert advisor to ensure your success. We created this SMB-friendly cyber compliance model based on our experience helping dozens of companies achieve their compliance objectives.

The Rizkly applications supports CMMC certification requirements like auditor access and level-specific controls, saving you hassle and money. Rizkly lets you automatically generate audit-report reports such as a system security plan (SSP) so your teams are not

Below are some of the CMMC compliance activities where Rizkly vCOs assist defense contractors from the moment you start with us.

- Gap Assessment, CUI identification and boundary definition so your scope is correct
- Expert assistance with policy creation and evidence collection plans
- Audit-ready documents (SSP, IRP, etc.)
- Assistance in creating procedures, risk mitigation plans & preparing for your CMMC assessment
- Ongoing PMO/advisory and quarterly reviews with leadership team to ensure you stay on track

## Demonstrate CMMC Compliance

Large companies have compliance departments and big budgets for complex software and consulting engagements to manage compliance. Small and mid-size defense contractors now have the Rizkly CMMC compliance app, an easy-to-use SaaS cloud software tool that lets you demonstrate your CMMC compliance. Together with your Rizkly vCO, the Rizkly app serves as the single place where you organize documents and demonstrate CMMC policies, procedures and tracking for ongoing cyber hygiene.

## Work with a Rizkly CMMC Expert from Day 1

After choosing Rizkly, your vCO will contact you to get a baseline understanding of your organization and your environment, and to schedule a gap assessment. At the end of the assessment, your Rizkly vCO provides a prioritized plan for achieving CMMC certification at your targeted level. From the start, your vCO works closely with you and is always accessible, improving your firm's security & compliance acumen as well as its cyber posture.

## Why Rizkly

- A complete CMMC compliance solution that is effective and efficient
- Affordable subscription pricing that includes a powerful SaaS cloud app as well as expert advisory
- Experienced partner with dozens of completed NIST compliance engagements
- Peace of mind knowing you will achieve continuity with DoD contracts without breaking the budget

If Rizkly sounds like the right path for your firm's CMMC readiness and certification success, please contact us today. We'd love to learn more about your needs and tell you more about Rizkly.
